

# EASY LIQUIDS FLOWPHOS 10

## PRODUCT GUIDE

### OVERVIEW

EASY Liquids FLOWPHOS 10 is a true liquid fertiliser which contains 100% water soluble nitrogen, phosphorus, potassium and zinc, for in-furrow application with billets during sugarcane planting. EASY Liquids FLOWPHOS 10 allows nutrients to be accurately and evenly placed in the required position, which is very important for phosphorus and zinc as they are very immobile in the soil. EASY Liquids are manufactured at our regionally located plants with the highest quality standards.

### ANALYSIS

N		P		K	S	Ca	Mg	B	Cu	Fe	Mn	Mo	Zn	SG
Total N	Nitrate	Ammonium	Urea	Phosphorus	Potassium	Sulphur	Calcium	Magnesium	Boron	Copper	Iron	Manganese	Molybdenum	Zinc
12.6		5.2	7.4	10	5.1								0.4	1.29

All nutrient content is shown in w/v.

### USAGE RECOMMENDATIONS

#### SUGARCANE

Application equipment used to apply EASY Liquids FlowPhos 10 in-furrow, ensures it is delivered precisely, evenly and safely, giving all newly emerged roots immediate access to the applied available nutrients. For optimal placement, FlowPhos should be applied using a dedicated liquid fertiliser tank. A standard 12 volt pump can be used to direct the product on top of the cane setts just before discs close the furrow. Applied at 100 L/ha, FlowPhos 10 delivers 10kg of phosphorus per hectare and can be applied up to 260 L/ha safely.

#### POTATO FRESH MARKET

600-800 L/ha at planting and 250 L/ha from hilling to bulking.

#### POTATO PROCESSING

600 L/ha at planting.
