

EASY LIQUIDS FLOWPHOS KZ

PRODUCT GUIDE

OVERVIEW

EASY Liquids FLOWPHOS KZ is a true liquid fertiliser which contains 100% water soluble nitrogen, phosphorus, potassium and zinc, for application at planting in broad-acre or row crops and fertigated in horticultural crops. EASY Liquids FLOWPHOS KZ allows nutrients to be accurately and evenly placed in the required position, which is very important for phosphorus and zinc as they are very immobile in the soil. EASY Liquids are manufactured at our regionally located plants with the highest quality standards.

ANALYSIS

N		P	K	S	Ca	Mg	B	Cu	Fe	Mn	Mo	Zn	SG		
Total N	Nitrate	Ammonium	Urea	Phosphorus	Potassium	Sulphur	Calcium	Magnesium	Boron	Copper	Iron	Manganese	Molybdenum	Zinc	
7.5		7.5		14.1	6.5									0.5	1.34

All nutrient content is shown in w/v.

USAGE RECOMMENDATIONS

LEGUMES

By combining Flowphos and inoculant applications together in the same tank, the inconvenience of inoculating seed is removed from the planting operation. FlowPhos and inoculant is placed in the bottom of the seed furrow, giving immediate access to germinating seeds. EASY Liquids FlowPhos 15 can be applied at 20-40 L/ha, diluted 50:50 with water.

GRAPE - WINE

20-50 L/ha at post harvest.

POTATO FRESH MARKET

70 L/ha at planting.

GRAPE - TABLE

50-75 L/ha post harvest.

POTATO PROCESSING

100 L/ha at planting.

LETTUCE

Apply 20-60 L/ha banded in the transplant furrow at planting (1-3 mL/metre of row). Can be applied either neat or diluted with 10-50 L/ha of water.

SUGARCANE

Apply 35-70 L/ha applied in multiple bands directly over billets at planting. Can be applied either neat or diluted with 10-50 L/ha of water.

TOMATOES

Apply 30-40 L/ha banded in the transplant furrow at planting. Can be applied either neat or diluted with 10-50 L/ha of water.
