

# EASY LIQUIDS MICRO - SUL PRODUCT GUIDE

## **OVERVIEW**

EASY Liquids MICRO-SUL is a liquid foliar fertiliser containing nitrogen, sulphur, iron, zinc and copper, which is used to alleviate waterlogging in crops. Waterlogging reduces availability of nitrogen, sulphur, iron and zinc for uptake by plants, which are essential for healthy plant growth. EASY Liquids are manufactured at our regionally located plants with the highest quality standards.

### **USAGE RECOMMENDATIONS**

#### CANOLA

Foliar apply 2-3 L/ha from 4 to 9 leaf growth stage. Add 100 mL/100 L of WETTER 1000. Minimum water rate: 30 L/ha by air and 50 L/ha by ground.

#### COTTON

Foliar apply 2-3 L/ha from 4 leaf to flowering growth stage. Add 100 mL/100 L of WETTER 1000. Minimum water rate: 30 L/ha by air and 50 L/ha by ground.

#### MAIZE

Foliar apply 2-3 L/ha from 2 to 6 leaf growth stage. Add 100 mL/100 L of WETTER 1000. Minimum water rate: 30 L/ha by air and 50 L/ha by ground.

#### SORGHUM

Foliar apply 2-3 L/ha from 3 to 6 leaf growth stage. Add 100 mL/100 L of WETTER 1000. Minimum water rate: 30 L/ha by air and 50 L/ha by ground.

#### WINTER CEREAL

Foliar apply 2-3 L/ha from 5 leaf to fully tillered (GS Z15 to GS Z31). Add 100 mL/100 L of WETTER 1000. Minimum water rate: 30 L/ha by air and 50 L/ha by ground.

- Should be used within 3 MONTHS of the date of manufacture.
- Apply to alleviate waterlogging symptoms
- If additional nitrogen is required, MICRO-SUL can be co-applied with N-FOL. Refer to N-FOL recommendations for application rates.

For detailed fertiliser recommendations for your crops please contact your local EASY Liquids sales agronomist.

Disclaimer: Whilst these recommendations are typically right for most cropping situations, this is intended as a helpful guide. You should consult with your agronomist or crop nutrition expert to ensure you have the right product and application rate for your crop. Farming situations and nutrition requirements of crops vary.
