

EASY LIQUIDS N-CAL 15-18

PRODUCT GUIDE

OVERVIEW

EASY Liquids N-CAL 15-18 is clear liquid fertiliser containing 100% water soluble calcium and nitrate nitrogen, for application through fertigation systems to horticultural crops. Nitrate nitrogen is the preferred nitrogen source for most horticultural and high value crops. It is immediately available for plant uptake, resulting in fast and predictable growth responses. Calcium improves cell wall strength, leading to better quality, shelf life and lifting marketable crop yields. Also, increased cell wall strength helps plants tolerate disease and insect infection. EASY Liquids are manufactured at our regionally located plants with the highest quality standards.

ANALYSIS

N		P	K	S	Ca	Mg	B	Cu	Fe	Mn	Mo	Zn	SG
Total N	Nitrate Ammonium	Phosphorus	Potassium	Sulphur	Calcium	Magnesium	Boron	Copper	Iron	Manganese	Molybdenum	Zinc	
14.9	13.9	1			18.1								1.5

All nutrient content is shown in w/v.

USAGE RECOMMENDATIONS

Should be used within 7 days of the date of manufacture.

ALMOND

Fertigate 250-300 L/ha during growth stages; bud burst & end of bloom to full leaf expansion in multiple applications.

APPLE

Fertigate 150-200 L/ha in multiple applications from growth stage; Bud burst to early fruit development and 60-80 L/ha during post-harvest.

CITRUS

Fertigate 200-300 L/ha in multiple applications from growth stage; new flush to early fruit development.

GRAPE - TABLE

Fertigate 200-240 L/ha in multiple applications from growth stage; Bud burst to bunch closure and 50-70 L/ha during post-harvest.

GRAPE - WINE

Fertigate 140-200 L/ha in multiple applications from growth stage; Bud burst to bunch closure and 40-60 L/ha during post-harvest.

POTATO PROCESSING

Fertigate 200-400 L/ha between hilling up and early bulking.

TOMATO

Field Grown

Fertigate 300-400 L/ha split into 10 weekly applications, starting 3-4 weeks after transplanting.
