

EASY LIQUIDS N26

PRODUCT GUIDE

OVERVIEW

EASY Liquids N26 is a liquid nitrogen product containing urea nitrogen which is available during summer (it is N24 during winter months). It provides a convenient solution to supply in-crop nitrogen for irrigated crop programs with no additional application costs as it is applied with the irrigation water. EASY Liquids are manufactured at our regionally located plants with the highest quality standards.

ANALYSIS

N		P	K	S	Ca	Mg	B	Cu	Fe	Mn	Mo	Zn	SG
Total N	Nitrate Ammonium	Phosphorus	Potassium	Sulphur	Calcium	Magnesium	Boron	Copper	Iron	Manganese	Molybdenum	Zinc	
26.0													1.12

All nutrient content is shown in w/v.

USAGE RECOMMENDATIONS

PREPLANT

Spray directly on the soil surface. Incorporation by cultivation or irrigation/rainfall is recommended to reduce the risk of volatilisation.

- Carrier for Fallow herbicides: 80-100 L/ha (refer to total volume state of herbicide label). N26 can be used as a carrier for Glyphosate, applied as a pre-plant knockdown. Check with EASY Liquids Agronomists for AgChem product compatibilities.
- Water run – furrow irrigation: up to 500 L/ha.

PLANTING

Can be applied between the rows, or in front or behind non-seeding tines to achieve soil incorporation. Care should be taken to avoid direct contact with the seed at rates listed below.

- Canola: 100-200 L/ha.
- Winter cereals: 100-200 L/ha.

FERTIGATION / WATER RUN

Can be applied to crops with irrigation water. Ideally suited to furrow, overhead and drip irrigation systems.

- Cotton, maize, sorghum, sunflower - up to 600 L/ha or 1/2 to 1/3 of total N requirements.
- Maize, sorghum sunflowers - all summer crop potential. Also spring watering of wintercrop.

TOPDRESS USING STREAMING NOZZLE

(Large droplets)

- Canola: apply at rates up to 250 L/ha from the 5 leaf stage (Growth Stage 1.55) to the start of flowering (Growth Stage 4.0). DO NOT apply while the crop is flowering.
- Winter cereals: apply at rates up to 250 L/ha from the 5 leaf stage (Growth Stage Z15) to the start of flowering (Growth Stage Z60). DO NOT apply while the crop is flowering.
